Budget Billing Payment Option

ComFurT Gas, Inc. (ComFurT) has a plan to help our customers maintain a monthly family budget and keep the gas utility bills paid in a timely manner.

Here is how it works:

- 1) We calculate your gas consumption (in gallons) for the previous 12 months,
- 2) Your annual consumption is divided by 11 to arrive at your monthly Budget Billing Consumption Amount.
- 3) ComFurT then multiplies the Budget Billing Consumption Amount by the estimated per gallon price of LP for the next 12 months,
- 4) If applicable, sales taxes and a monthly amount for tank rental are added to come to the monthly Budget Billing Amount due for the first 11 months of the Budget Billing Year,
- 5) In the 12th month of the plan you will be charged or credited with the Actual Remaining Balance on your account.
 - a. In some instances the amount due in the 12th month may be larger than the previous Budget Billing Amount due to higher than expected LP prices or higher uses.
 - b. In other cases the amount due may be less than the previous Budget Billing Amount or even a credit balance if your usage is less than expected for the Budget Billing Year or the LP prices are lower than expected.
- 6) ComFurT may change the Budget Billing Amount to reflect changes in the price of LP or in your LP consumption.

Requirements:

- 1) This option is only available for setup between April and September.
- 2) Your current account balance must be a zero.
- 3) To stay eligible for this plan you must pay your Budget Bill Amount or the 12th month Actual Remaining Balance by the 15th of the month. Any other purchases (besides LP and Tank rent) must be paid in addition to the Budget Bill Amount.
- 4) Upon leaving the Budget Billing Plan you will be responsible for paying the actual account balance by the 15th of the following month.

If you think this a plan that will work for you then your options from here are:
